

Assignment #1: Response #6: Male-Female Differences in Average Rating

测验, 5 个问题

1
point

1.

Which movie do female raters rate the highest above male raters (i.e., which has the largest difference female - male average)?

2396

1
point

2. How big was the difference in average rating?

2.107143

1
point

3.

How about the other way around? Which movie did males rate most highly above female raters?

1198

1
point

4. How large was the difference in mean rating?

Assignment #1: Response #6: Male-Female Differences in Average Rating

测验, 5 个问题

1
point

5。

Finally, what is the difference between the average female rating overall and the average male rating overall? This should be a positive value if females rate higher, negative if males rate higher. Be sure to give at least three decimal places.
